Formula Student Türkiye 2026

22
18 teams from Turkey, 4 teams from abroad.

840
Most engineering students from various disciplines; dozens of competitors.

2000
Hundreds of spectators, including students, graduates, industry professionals, and racing enthusiasts.

65
A total of 65 volunteers, including technical referees, supervisors, and field workers.

A total of **61** teams, including 26 from abroad, participated in the pre-registration and quiz stages of the second FST.

Dynamic Stages

Teams competed in the electric and combustion categories. The compliance of the vehicles with the rules and their designs were evaluated by alumni with Formula Student experience and competent engineers working in the automotive main industry.

Static Stages

Teams presented their engineering designs, cost calculations, and business ideas developed through real-world scenarios to juries composed of industry professionals, each a top executive in the business world.

Formula Student Türkiye 2026

Turkish Automobile Sports Federation

In 2026, TOSFED's support continued to grow. Unlimited support was provided regarding the use of the Körfez Racetrack, garages, camping area, measurement and observation equipment, fire extinguishing infrastructure, radio system, and the allocation of referees.

Formula Student Turkey is more than just a racing event.

As an umbrella organization, it continued to offer consultancy services and provide training and certification opportunities in various fields. An 8-week training program was presented to the teams during the summer.

We grew stronger with the increase in our supporters.
